Subject: Please do not pass hosue bill 4936

Good Committee Members,

My name is Rose Sambou, I am writing this letter to ask that you **please not pass house bill 4936**. I am the daughter of a catastrophic automobile accident victim. After his accident he was removed from the ventilator too soon and got some brain damage. After getting some of his memory back and gaining a number of medical problems related to the accident such as being unable to walk more than a few steps, without falling, oxygen around the clock, renal dialysis because of renal failure, congestive heart failure and because of the multiple medications, he is now considered legally blind. He has to have medical assistance 24 hours a day and cannot survive without assistance. Please don't pass this bill! His life depends on it!
